

BEST PRACTICE-II

Entrepreneurship Development

Goal: Education plays a crucial role in the development of entrepreneurship by equipping individuals with the necessary knowledge, skills and mindsets to identify business opportunities, create new ventures and manage them effectively. Education fosters entrepreneurial spirit that enable people to turn ideas into reality and contribute to economic growth. Our institution is always committed to create a congenial environment towards fostering entrepreneurship. The institution takes some initiatives for empowering students economically along with their academic endeavour.

Context: Entrepreneurship Development refers to the process of enhancing the skills and knowledge of individuals to enable them to establish, manage and grow their own businesses. This process plays an important role in creating job opportunities, establishing firms and factories, fostering economic growth and innovation. Entrepreneurship development leads to increased productivity and reduced unemployment. In this context, our Institution take some initiatives to help students for economic self-sufficiency and self-reliant.

The Practice: The institution provides opportunities for students by offering some skill enhancement courses like Mushroom Cultivation, Beautician, Make -up Artist, LED bulb making etc. beside this institution organizes some seminar, workshop to promote entrepreneurship. On the occasion of Bohag Bihu the institution organized Bohagi Mela, an exhibition and sale Centre in its campus. This is an initiative to help students to showcase their creativity and allowing them to convert their passion of art and craft into an income generation venture and becoming self- reliant. Moreover, by observing World Entrepreneurship Day the institution creates awareness for entrepreneurship, innovation and leadership among students.

Evidence of success: As evidence of success, it is seen that our students are motivating towards self- dependent and economically empowered. By using their talent and innovation some students are now able to become entrepreneurs.

Problems encountered: The main problem is that all students are not aware in such issues. Beside this social surrounding also not encouraged them to become an entrepreneur. Due to busy academic schedule and time constraint the institution also unable to offers various scopes and supports to the students.

PROMOTING SKILL AMONG STUDENTS
