UNIVERSITY**

- **THE PREAMBLE**

Education unfolds what is already enfolded in man. In this sense, the aim of education is to help people develop, enhance and realize their inherent potentialities. Education is also recognized as the mirror of society. In this sense, it is an instrument to achieve larger societal goals. Hence, education being as a social process has been concerned with preparing the members of the society to adapt to the constantly changing conditions of the society. As such, honoring diversity and ensuring inclusion by treating all with respect and dignity, showing sensitivity to gender, cultural and religious differences has become an important element of education discipline.

Education is further loaded with the responsibility of developing core competencies such as communication skills required to articulate thoughts and ideas effectively, using oral and written communication skills, and to present information and explanations in a well-structured manner. Keeping in view the dynamic nature of society, education as a discipline is to develop competencies and actions required for keeping oneself professionally engaged and participate in learning to update knowledge and practice.

Change is the unchangeable law of nature and therefore, society is not a static entity. With the continuous changes taking place in the society, the nature and scope of education also changes and enlarges. Education which is deemed to be a solution for all social problems has to be up-to-date of all these changes happening in the society. Educators and educational practitioners should also change them accordingly.

The main purpose of the Undergraduate Programme in Education is to develop and disseminate knowledge, skills and values through education, field-based training and research relevant for promoting, maintaining and improving the functioning of individuals, families, groups, organizations and communities existing in the society.

The curriculum for Education at undergraduate level therefore, has incorporated certain new components of learning in order to make it relevant to the contemporary society and modern practices. It is expected that the prepared LOCF for Education at undergraduate level and FYUGP will be of immense relevance to the prospective graduates having interest in education and practice. It will be very advantageous to make students of Education more dynamic and adaptable by enhancing their skills leading to their increased employability. The discipline will also help in shaping the students' overall personalities to take on the challenges of an emerging competitive society. It has incremental learning experiences that will enhance the

abilities of students who come from diverse backgrounds. It will also provide opportunities to develop individual potentialities and to produce a pool of better professionals each year.

- **INTRODUCTION:**

Higher Education in India is considered as a critical core in the development and growth strategy of the nation. According to NEP 2020, Higher Education should put an emphasis on recognising, identifying, and fostering each student's unique strengths by educating teachers and parents about the need of encouraging each student's holistic development in both curricular and co-curricular areas. It must be flexible enough to allow students to select their learning paths and programmes and, in turn, pick their own life choices based on their talents and interests. For a pluralistic world, there should be a focus on multidisciplinary and a comprehensive education in the sciences, social sciences, arts, humanities, and sports to ensure the unity and integrity of all knowledge.

Education as a discipline is very broad as well as dynamic. Its boundaries are extensive and encompasses our entire lives. In the process of evolution of the discipline, it has gone through different stages, and is continuously advancing and developing. It addresses philosophical, psychological, technological aspects, societal issues, etc. Education as a discipline is taught at Bachelor's and Master's Levels at different colleges and universities in India. It enhances student learning in Education as a Social Science discipline.

The Bachelor of Arts in Education degree of Dibrugarh University adapted as per the recommendations of NEP 2020 will also be of either three or four year duration, with multiple exit options within the period with appropriate certification. After completion of one year a UG certificate, after completion of two years a UG diploma, after completion of three years a Bachelor's degree in the programme will be provided to the students. The four year undergraduate programme in Education will allow the student an opportunity to experience the full range of holistic and multidisciplinary education, along with the chosen Major and Minor choices of the students.

- **AIMS OF FOUR YEAR UNDER-GRADUATE PROGRAMME (FYUGP) IN EDUCATION:**

The aims of Four Year Under-Graduate Programme (FYUGP) in Education are:

1. To enhance the student's learning of Education as a Social Science discipline, by providing students with a rigorous and challenging educational experience aiming to develop sound theoretical background in the subject.

**Course Objectives:** The course aims to develop understanding of teaching-learning process and pedagogy for teaching. It also aims to develop competence in practicing microteaching skills and lesson planning.

**Course Outcomes (COs):** The students will be able to-

CO1: Discuss the teaching-learning process.

LO1.1: Describe the meaning, nature and principles of teaching.

LO1.2: State the general maxims of teaching.

LO1.3: Discuss effective teaching.

LO1.4: Differentiate the three phases of teaching: pre-active, interactive and post active.

LO1.5: Compare the three levels of teaching: memory, understanding and reflective.

CO2: Discuss teaching behaviour.

LO2.1: Explain the three teaching behaviours: Authoritative, Democratic and Laissez-faire.

LO2.2: Describe the concept, importance and cycle of microteaching.

LO2.3: Explain the microteaching skills.

LO2.4: Explain meaning and importance of lesson plan.

LO2.5: Describe the Herbartian steps of planning a lesson.

LO2.6: Classify the three types of lesson: knowledge lesson, appreciation lesson and skill lesson.

CO3: Explain pedagogy for teaching.

LO3.1: Define pedagogy.

LO3.2: Describe the innovations in teaching-learning process.

LO3.3: Explain innovative pedagogy.

LO3.4: Discuss innovation in pedagogy and NEP 2020.

LO3.5: Explain the meaning, need and types of teaching aids.

LO3.6: Prepare teaching aids.

LO3.7: Discuss the use of technology in teaching.

CO4: Practice teaching.

LO4.1: Practice microteaching skills.

LO4.2: Prepare lesson plans.

LO4.3: Prepare digital lessons.
